## Southern Regional Honors Council Conference - Spring 2019

|              |              |                      |                      |                |     |     |
|--------------|--------------|----------------------|----------------------|----------------|-----|-----|
| Registration | Registration | Mar 28, 2019 7:00:00 | Mar 28, 2019 5:00:00 | West Mezzanine | PUB | Yes |
|--------------|--------------|----------------------|----------------------|----------------|-----|-----|

|                  |  |                      |                       |                |     |     |
|------------------|--|----------------------|-----------------------|----------------|-----|-----|
| Explore Memphis! |  | Mar 28, 2019 8:00:00 | Mar 28, 2019 11:00:00 | West Mezzanine | PUB | Yes |
|------------------|--|----------------------|-----------------------|----------------|-----|-----|

*This is an opportunity for early-arriving attendees to explore Memphis! There will be more opportunities for you to see the city throughout the conference for those arriving closer to the start of sessions.*

|                           |            |                       |                       |         |     |     |
|---------------------------|------------|-----------------------|-----------------------|---------|-----|-----|
| Student Moderator Meeting | Conference | Mar 28, 2019 10:30:00 | Mar 28, 2019 11:00:00 | Jackson | PUB | Yes |
|---------------------------|------------|-----------------------|-----------------------|---------|-----|-----|

|                             |            |                       |                       |         |     |     |
|-----------------------------|------------|-----------------------|-----------------------|---------|-----|-----|
| Executive Committee Meeting | Conference | Mar 28, 2019 11:00:00 | Mar 28, 2019 12:00:00 | Jackson | PUB | Yes |
|-----------------------------|------------|-----------------------|-----------------------|---------|-----|-----|

|                            |              |                       |                       |                    |     |     |
|----------------------------|--------------|-----------------------|-----------------------|--------------------|-----|-----|
| Lunch and Welcome to SRHC! | Dining Event | Mar 28, 2019 11:00:00 | Mar 28, 2019 12:00:00 | Grand Ballroom ABC | PUB | Yes |
|----------------------------|--------------|-----------------------|-----------------------|--------------------|-----|-----|

*\*SALADS\**  
Chopped Romaine, Roasted Pecans, Radish, Tomato, Cucumber, Fresh Fruit, Cheddar herb dressing  
\*\*\*

*Peabody Coleslaw*  
green & purple cabbage, carrot, buttermilk dressing  
\*\*\*

*\*ENTRÉES\**  
BBQ Brisket  
braising jus, caramelized onions  
\*\*\*

*Roasted Frenched Chicken Breast*  
molasses-Jack Daniel's BBQ sauce  
\*\*\*

*\*\*Chef's Choice of Vegan Entree\*\**  
\*\*\*

*\*SIDES\**  
Corn Pudding  
\*\*\*

*Honey Mustard Baked Beans*  
\*\*\*

*\*DESSERTS\**  
Red Velvet Cake  
\*\*\*

*Bourbon Pecan Pie*  
\*\*\*

*Banana-Chocolate Chip Bread Pudding*  
\*\*\*

| <p><i>Luncheons Include Freshly Baked Rolls, Peabody Coffee, Decaf and a Selection of Premium Teas</i><br/> <b>**HAVE SOY OR ALMOND MILK AVAILABLE AS A DAIRY-FREE ALTERNATIVE**</b></p>   |        |                       |                      |          |            |           |
| Colonialism, Historical Symbolism, and Culture   | Talk   | Mar 28, 2019 12:00:00 | Mar 28, 2019 1:00:00 | Auburn   | PUB        | Yes       |
| <p><i>Beyond the Wars on the River: An Analysis of the Historical Markers in Savannah, Georgia</i><br/> Linnea Ryan - Georgia Southern University<br/> A contextual and spatial analysis of the historical markers in Savannah, Georgia and their place within the cultural landscape. The Symbolism of Sir Gawain's Shield<br/> Natalie Walls - Jacksonville State University<br/> This presentation covers the symbolism of Sir Gawain's shield in the poem Sir Gawain and the Green Knight. By exploring both the inside and outside of the shield, a comparison between an individual's personal and private side can be made. How Black-on-Black crime effects the relationship between law enforcement and the African American community<br/> <b>Jneva Norfleet - Virginia State University</b><br/> The relationship between the Black community and law enforcement has been one of consistent animosity, producing complex urban problems across America. Blacks often believe they are deprived of police protection and police refrain from addressing criminal behavior within the Black community. Resolution to this problem begins with an end to violence within the community.</p>   |        |                       |                      |          |            |           |
| Exposure to Culture  | Talk   | Mar 28, 2019 12:00:00 | Mar 28, 2019 1:00:00 | Cockrell | PUB        | Yes       |
| <p><i>Science and Culture: The Unexpected Journey of Partners in the Parks Hawai'i Volcanoes</i></p> <p><b>Calvin Andries, and Mackenzie Porten - Eastern Kentucky University, University of Alabama at Birmingham</b></p> <p>An NCHC Partners in the Parks trip to Hawai'i Volcanoes National park exposed attendees to Polynesian culture, and let them get immersed in the ongoing debate over TMT: a new telescope that is proposed to be built on top of Mauna Kea.</p> <p><i>How Attitudes and Assumptions Towards American Indian Intelligence, Economic Practices, and Religious Ideologies Led to Removal from Tribal Lands</i><br/> <b>Hunter Hays - Birmingham-Southern College</b></p> <p>By perpetuating stereotypes of American Indian intellectual, economic, and religious inferiority, the United States government justified the removal of Natives from tribal lands and slaughter of countless others during the span of 1789-1880.<br/> Proverbs From Around the World: Global Connections</p> <p><b>Sarah King - Eastern Kentucky University</b><br/> In this presentation, I will showcase proverbs from various cultures across the globe and explain their meanings, their similarities to biblical proverbs, and their applicability to daily life regardless of one's religious belief.</p> |        |                       |                      |          |            |           |

| Title   | Format        | Start                 | End                  | Room          | Visibility | Published |
|---|---------------|-----------------------|----------------------|---------------|------------|-----------|
| <p>Science for the People 1</p> <p><i>The Need for Carbon Fiber Research to be Expanded</i><br/> <b>Kaitlyn Antonick - Georgia Southern University</b><br/> <i>The expansion of carbon fiber research is necessary to improve everyone's daily lives, by making transportation and other objects cheaper and greener. Carbon fibers may also allow scientists to understand more about our world and other planets.</i></p> <p><i>Variation in the Anatomy of Pulmonary Circulation in Necturus Salamanders</i><br/> <b>Alexandra Templin - Jacksonville State University</b><br/> <i>Salamanders from the Necturus genus were examined to better determine circulation surrounding the gills and lungs. The pulmonary artery in these specimens was not located as a branch of the second and third efferent branchial arteries, like expected.</i></p> <p><i>First Grade Thematic Unit - Past and Present</i><br/> <b>Anna Traylor - Jacksonville State University</b><br/> <i>First Grade Thematic Unit - Past and Future focus on a unit created for the first grade classroom using required standards from the CCSSI and Alabama standards involving multiple subjects.</i></p> | Talk          | Mar 28, 2019 12:00:00 | Mar 28, 2019 1:00:00 | Hawthorne     | PUB        | Yes       |
| <p>That's AMAZING! How the CBU Honors Program makes great students even greater by providing over 40 diverse honors events every semester</p> <p><b>Madison Bickerstaff, Allison Dufour, Margaret Hamer, Selena Wood, and Tracie Burke - Christian Brothers University</b><br/> <i>From a dynamic, interactive, recruiting session to a heartwarming graduation ceremony, we share the art and science of event programming in the CBU Honors Program and how we make great students even greater through providing over 40 events per semester. We will discuss how our honors board ideates, creates, and carries out our programming hallmarks of art and culture, professional development, engagement with Memphis and the Mid-South, service, community building, and shared intellectualism through the use of teams, communication, and proven systems.</i></p>   | Workshop      | Mar 28, 2019 12:00:00 | Mar 28, 2019 1:00:00 | Ben Hollander | PUB        | Yes       |
| <p>The Heart of It: School Climate and High Impact Practices</p> <p><i>Mora Rehm, and Katie Patton - Eastern Kentucky University</i></p> <p><i>School climate is the heart and soul of learning institutions and directly affects student learning and achievement. Faculty and student perspectives of Honors and high impact practices are shared, offering insight in valuing student voice.</i></p>   | Administrativ | Mar 28, 2019 12:00:00 | Mar 28, 2019 1:00:00 | Barclay       | PUB        | Yes       |
| <p>Best Practices in Implementing City as Text Pedagogy</p> <p><i>Salvatore Musumeci - Catawba College.</i></p> <p><i>This round table will focus on the value of using City as Text in places you and your students know well, such as your campus or home community.</i></p>  | Administrativ | Mar 28, 2019 1:15:00  | Mar 28, 2019 2:15:00 | Barclay       | PUB        | Yes       |

| Business 1  | Talk   | Mar 28, 2019 1:15:00 | Mar 28, 2019 2:15:00 | Cockrell  | PUB        | Yes       |
| <p><i>"How can I help you?" Retail service preferences in Central Alabama</i><br/> <b>Brennan Herring - Auburn University at Montgomery</b><br/> Do retail consumers always prefer proactive customer service? Or is the reality of consumers preferences more nuanced? This presentation analyzes this question and challenges common perceptions about the preferences of consumers in Central Alabama.</p> <p><i>Big Data in Small Businesses</i><br/> <b>Kelley Nemec - Georgia Southern University</b><br/> In an economy where insightful data analysis leads to the greatest success, businesses relying on old methods fall out of favor. To enter the data driven future, businesses must rethink how they operate.</p> <p><i>Dream. Inspire. Serve.</i><br/> <b>Mansi Suresh - Northern Virginia Community College</b><br/> Profit-driven companies outnumber nonprofits by roughly 3000% despite social and economic issues. Drawing from my own nonprofit, HHLC, I assert that nonprofits should be supported because they dream for change, inspire others, and serve communities.</p>   |        |                      |                      |           |            |           |
| Chemistry 1   | Talk   | Mar 28, 2019 1:15:00 | Mar 28, 2019 2:15:00 | Hawthorne | PUB        | Yes       |
| <p><i>Fabrication and Characterization of Electrospun Polydioxanone and Its Co-Polymers</i><br/> <b>William Cain, and Allison Fetz - The University of Memphis</b><br/> A new array of polydioxanone co-polymers had not been characterized for electrospinning. In this project, I fabricated and analyzed the mechanical properties of these polymers to determine their applicability as tissue regeneration scaffolds.</p> <p><i>CNS Penetration of Methotrexate and its Primary Metabolite 7-Hydroxymethotrexate in Mice Bearing Orthotopic Group 3 Medulloblastoma</i><br/> <b>Rachel Starker - Christian Brothers University</b><br/> The central nervous system penetration of methotrexate and its metabolite was evaluated using pharmacokinetic modeling of plasma and cerebral microdialysis extracellular fluid data in non-tumor bearing mice and will be studied in tumor-bearing mice.</p> <p><i>Photocatalytic activity of SrTiO3 nanoparticles and their toxicity effects on C. elegans</i><br/> <b>Tyler Wagner - Georgia Southern University</b><br/> In this work, size-selective SrTiO3 nanoparticles were synthesized via an ultrasonic-based approach, followed by a quantification of their photocatalytic reactivity and physiological effects using <i>Caenorhabditis elegans</i> worms.</p> |        |                      |                      |           |            |           |
| Major Female Authors 1  | Talk   | Mar 28, 2019 1:15:00 | Mar 28, 2019 2:15:00 | Brinkley  | PUB        | Yes       |
| <p><i>A (Feminist) Truth Universally Acknowledged: A Study of Pride and Prejudice</i><br/> <b>Megan Smith - Catawba College</b><br/> Though renowned for its romance, <i>Pride and Prejudice</i> also offers superb commentary on the lives of women. Regency England may have been patriarchal, but this narrative is not – as shown through Elizabeth, Charlotte, Miss Bingley, and beyond.</p> <p><i>Penning Consciousness: Underrepresented Female Voices of 20th Century American Poetry</i><br/> <b>Elizabeth Von Mann - Morehead State University</b><br/> This project seeks to analyze five American women poets over the course of North American literary history in order to track the evolution of female poetry. The timeline will begin with H.D., Gertrude Stein, Audre Lorde, and then finally Maya Angelou. The ways in which creativity and politics interrelate is at the crux of this work. The project assumes that each poet made a substantial and unique contribution to the evolution of both women's poetry and women's rights.</p>  |        |                      |                      |           |            |           |

| Title  | Format        | Start                | End                  | Room          | Visibility | Published |

| Terrorism  | Talk          | Mar 28, 2019 1:15:00 | Mar 28, 2019 2:15:00 | Auburn        | PUB        | Yes       |
| <p><i>Shadow of 9/11: War on a Religion not a War on Terror</i></p> <p><b>Paige Anderholm - Appalachian State University</b></p> <p><i>U.S. policymakers misconstrue and misdefine terrorism, leading to diminished international credibility, warped budgetary priorities, and unnecessary casualties. This presentation will present a more effective and redirected anti-terror strategy.</i></p> <p><i>Genocide Masquerading: US-Apartheid Relations</i></p> <p><b>Jessica Forsee - Georgia Southern University</b></p> <p><i>The apartheid regime represented an anomaly in Post-War relations that the US had to grapple with. This paper provides in depth analysis of the coined turning points in apartheid rule: the Sharpeville Massacre and the Soweto Uprising.</i></p>   |               |                      |                      |               |            |           |
| The Challenges of Interdisciplinary Courses  | Workshop      | Mar 28, 2019 1:15:00 | Mar 28, 2019 2:15:00 | Ben Hollander | PUB        | Yes       |
| <p><b>Mike Sloane, Rusty Rushton, Rebecca Freeman, and Donna Andrews - University Honors Program, UAB</b></p> <p><i>An interdisciplinary curriculum is a central feature of honors pedagogy. There are many barriers to implementing an interdisciplinary curriculum in an honors program or college. This workshop will explore the challenges of offering interdisciplinary courses and curricula. We will also discuss issues related to academic advising in an interdisciplinary setting.</i></p>   |               |                      |                      |               |            |           |
| "Let's Make a Deal" for MOUs   | Administrativ | Mar 28, 2019 2:45:00 | Mar 28, 2019 3:45:00 | Barclay       | PUB        | Yes       |
| <p><i>Kathleen King, Hillsborough Community College</i></p> <p><i>"Come on down" and discuss how my students might seamlessly transfer to your institution/program/college. Hillsborough Community College students are smart, diverse, involved, and prepared to transfer!</i></p>  |               |                      |                      |               |            |           |
| Depiction of Sexual Harassment in the Media  | Talk          | Mar 28, 2019 2:45:00 | Mar 28, 2019 3:45:00 | Auburn        | PUB        | Yes       |
| <p><i>Comparing How American Newspapers In 2017 Framed the MeToo Movement</i></p> <p><b>Julia Fechter - Georgia Southern University</b></p> <p><i>This project explored three American newspapers' coverage of the MeToo movement. It determined whether the newspapers supported, criticized or were neutral toward MeToo by examining the language, sources, and topics discussed in the articles.</i></p> <p><i>The Depiction of Sexual Consent and Misconduct in Contemporary Black Film</i></p> <p><b>Myaah Hayes - Norfolk State University</b></p> <p><i>There has been a constant battle for clear consent being given within sexual contexts. To understand consent, scenes from Spike Lee's <i>She's Gotta Have It</i> (1986) and Gina Prince-Bythewood's <i>Love &amp; Basketball</i> (2000) will be studied.</i></p> |               |                      |                      |               |            |           |

| <p><b>Abdullah Syed, Director of Partnerships - Student Opportunity Center</b><br/> <i>With the advent of artificial intelligence and automation, society will go through increasingly tumultuous changes with career pathways becoming increasingly competitive and dynamic. These changes will put increasing economic pressure on recent graduates, require reasoning/critical thinking skills for life-long learning, and require global/cross-cultural understanding. High-Impact Practices have been shown to be a powerful tool to improve student outcomes and prepare them for life in the 21st century. The Co-Founder of SOC will present from the perspective of a recent graduate and educational technology company founder with a broad view of the tech and higher ed landscape. The following questions will guide the presentation: How do students today need to adapt? How can higher education cope with these changes? As community leaders, what is the role of higher education? These questions and others will be addressed in a review of societal and economic data trends, recent survey responses on student views of HIPs, and examples of the latest work institutions have undertaken to expand HIP access. The session will conclude with a review of the role of technology in expanding student access to HIPs. A brief Q&amp;A discussion will follow.</i></p>   |          |                      |                      |           |            |           |

| <p><i>Perfection: The Fatality of Down Syndrome</i><br/> <b>Mallory Baucom - Gardner-Webb University</b><br/> Down syndrome is but one characteristic that a person may possess. It should not be a defining characteristic. Societal pressures for physical perfection negatively affect termination rates of pregnancies of babies with Down syndrome.</p> <p><i>The Importance of Facilitating Leadership for Both Freshman and Upperclassmen at the Collegiate Level</i><br/> <b>Eden Craig, and Arturo Bello - The University of West Florida, Kugelman Honors Program</b><br/> With the tidal wave of stress and anxiety students face their first year in college, leadership roles are often not considered. However, getting involved in leadership early can be a defining asset in helping students adjust to collegiate life.</p> <p><i>Addiction Is Not Always a Choice</i><br/> <b>Tiffany Harvey - Chattanooga State Community College</b><br/> Addiction is at an all-time high with a pretentious population of understanding. I will explore the cause of multiple forms of addiction, the difference between addiction/obsession, and what measures should be taken to resolve this detrimental issue.</p>   |          |                      |                       |                                  |            |           |
| The Role of Honors Student Organizations in Building and Sustaining a Robust Honors Presence on Campus  | Workshop | Mar 29, 2019 8:30:00 | Mar 29, 2019 9:30:00  | Ben Hollander                    | PUB        | Yes       |
| <p><b>Victoria Rocquin, Jessica Litolff, Mollie Millet, Basanta Khakurel, and Sheldon Holsapple - Southeastern Louisiana University</b><br/> Honors programs often operate with limited support. This roundtable discussion led by officers in an active honors student organization will discuss successful (and a few not-so-successful) strategies for implementing social, philanthropic, and academic activities for the larger honors program. Discussion topics include strategies to encourage student and faculty participation, using the organization to develop leadership and strategic planning skills, and the role of the student organization in assimilating new honors students. Ideas for successful organizational structure and the best and worst of social, fundraising, and academic activities will be discussed.</p>   |          |                      |                       |                                  |            |           |
| Posters 1 - Sponsored by the National Society of Collegiate Scholars  | Poster   | Mar 29, 2019 9:00:00 | Mar 29, 2019 12:00:00 | Continental Ballroom / Louis XVI | PUB        | Yes       |
| <p><i>This poster session was made possible through a generous donation from the National Society of Collegiate Scholars. Thank them for their support!</i></p> <p>1) <i>Elucidating the Role of Potential Regulatory Regions for the Amyloid Beta Degrading Enzymes ECE1 and ECE2: Relevance for Alzheimer's Disease</i><br/> Capri Alex - University Honors Program, UAB<br/> Cloning, transfections, and luciferase assays utilized to determine regulatory regions of variant AD genes for potential therapeutic treatments.</p> <p>2) <i>Contribution of sdRNA38A to prostate cancer;</i><br/> Krisha Amin - The University of South Alabama<br/> Recent genetic searches for tumor repressors have linked sdRNAs (snoRNA-derived RNAs) with prostate tumorigenesis. I will present preliminary results that indicate that sdRNA38A is in fact an endogenous regulator of TP63 in prostate cells.</p> <p>3) <i>Solidifying Competing Narratives Surrounding Mayor Loeb and His Involvement in the Assassination of Dr. Martin Luther King</i><br/> Mirissa Anderson - Christian Brothers University<br/> This poster will synthesize two prevailing narratives surrounding Mayor Henry Loeb and his role in the assassination of Dr. King in Memphis, Tennessee.</p> <p>4) <i>The Art of Invasion: Tracking the Movement of Bush Honeysuckle in ArcGIS</i></p> |          |                      |                       |                                  |            |           |

|---|--------|-------|-----|------|------------|-----------|
| <p><i>Calvin Andries - Eastern Kentucky University</i><br/> <i>This poster investigates the ability to map distributions of invasive plant species by focusing on the Amur bush honeysuckle, <i>Lonicera maackii</i>.</i></p>   |        |       |     |      |            |           |
| <p>5) <i>Sexing Juvenile Gopher Tortoises Using Morphometrics and Hormones</i><br/> <i>Hailey Baker - Georgia Southern University</i><br/> <i>Gopher tortoises are a keystone species for the southeast, but climate change is causing their numbers to decline. New methods to sex juveniles can tell us how global warming is affecting populations, and what conservation strategies should be taken.</i></p>  |        |       |     |      |            |           |
| <p>6) <i>Bridging the Gap Between Minorities and Outdoor Programming</i><br/> <i>Raiza Barahona, Braden Sanford, and Fatima Ejaz - University of Tennessee at Chattanooga</i><br/> <i>Understanding the obstacles that minorities encounter regarding outdoor programs is not only necessary to create projects that better facilitate outdoor involvement but also to promote physiological and psychological health in an equitable way.</i></p>                  |        |       |     |      |            |           |
| <p>7) <i>The Effects of the Relationship Between Racism and the Environment on Personal Health</i><br/> <i>Hannah Batsche - Eastern Kentucky University</i><br/> <i>The purpose of this study is to determine if there is a relationship between racism and the environment that affects the health of college students. The results show there is a relationship that is affecting the health of college students.</i></p>   |        |       |     |      |            |           |
| <p>8) <i>How does User Perception of Airline Security Impact their Satisfaction with their Travel Arrangements?</i><br/> <i>Philip Billings - The University of West Florida, Kugelman Honors Program</i><br/> <i>Studies have shown that there is a positive correlation between leisure traveler perceptions of safety and flight customer satisfaction. This study explores this topic further by examining user perceptions of security at the airport.</i></p> |        |       |     |      |            |           |
| <p>9) <i>The Effects of Acute and Chronic Ketosis on Golf Accuracy</i><br/> <i>Grant Blume, and Dr. Maleah Holland - Augusta University</i><br/> <i>This study examines the effects of acute and chronic ketone supplementation on putting accuracy in middle-aged adults. The results demonstrate no significant differences between the putting accuracy of the ketone group or placebo group.</i></p>  |        |       |     |      |            |           |
| <p>10) <i>Beyond Plastic Straw Bans: Smart and Sustainable Approaches to Plastics Policies in the United States</i><br/> <i>Mary Boujaoude - Eastern Kentucky University</i><br/> <i>Using plastic products harms the environment. To combat this, activists called to ban plastic straws but did not recognize those who need plastic goods. Strategies supporting sustainability while also considering vulnerable groups will be presented.</i></p>              |        |       |     |      |            |           |
| <p>11) <i>Sex Ratio Produced in Kemp's Ridley Recovery Program at the Padre Island National Seashore During the 2017 Nesting Season</i><br/> <i>Elizabeth A. Bradley - University Honors Program, UAB</i><br/> <i>This study, as a part of the Kemp's Ridley Recovery Program, histologically evaluates the sex ratios of Kemp's Ridley sea turtles from nests on Padre Island National Seashore during the 2017 nesting season.</i></p>                            |        |       |     |      |            |           |
| <p>12) <i>Generalization of Larger Geometrically Symmetrical Enclosure Without the Use of Sight</i><br/> <i>Kira Breen - Georgia Southern University</i><br/> <i>Participants were asked to find a hidden object in an enclosure while blindfolded and disorientated. To test for geometric generalization, they were then placed in an environment twice the original size, and asked to complete the same task.</i></p>   |        |       |     |      |            |           |
| <p>13) <i>Unity, Stewardship and the Pursuit of Huckleberries: A PITP Experience in Glacier National Park</i><br/> <i>Peyton Brock - Eastern Kentucky University</i><br/> <i>This poster provides an inside look on the experiential learning experience of attending a Partners in the Park excursion in Glacier National Park. Topics for discussion include park identity, culture, stewardship and park conservation.</i></p>                                   |        |       |     |      |            |           |

| Title  | Format | Start | End | Room | Visibility | Published |
|--|--------|-------|-----|------|------------|-----------|
| <p>14) <i>Protein Prenylation and Implications in Alzheimer's Disease</i><br/>           Caroline Brown - The University of North Georgia<br/>           This project seeks to understand prenylation patterns of three brain cell types: neurons, microglia, and astrocytes and the implications the patterns have for the development of Alzheimer's disease using a metabolic labeling approach to proteomics.</p>  |        |       |     |      |            |           |
| <p>15) <i>Photodynamic crystals and their applications</i><br/>           Jocelyn Brown - Virginia State University<br/>           Photodynamic crystals are crystals that bend, hop, and shatter when exposed to light due to gas release. This poster will highlight how gas release can provide a convenient rout to study photomechanical properties of the crystalline materials.</p>   |        |       |     |      |            |           |
| <p>16) <i>Effects of experimental warming and drought on leaf nutrient concentrations and resorption rates of boreal and temperate tree species</i><br/>           Hollie Bryan - Georgia Southern University<br/>           Increases in air temperature and drought severity associated with climate change led to changes in leaf nutrient content and resorption during senescence, which could ultimately alter long-term nutrient cycling in temperate and boreal forests.</p>   |        |       |     |      |            |           |
| <p>17) <i>Generalization of Geometrical Learning When Decreasing Enclosure Size</i><br/>           James Burnett - Georgia Southern University<br/>           Visuospatial ability is important to humans and other animals that navigate using sight. This study explores how the geometry of a space is learned and generalized across differed sized geometrically equivalent spaces.</p>   |        |       |     |      |            |           |
| <p>18) <i>Content Review of the CDC's National Centers for Chronic Disease Prevention and Health: Notice of Funding Opportunity (NOFO)</i><br/>           Makala Carrington, Colleen Shaw, MPH, and Brigette Ulin, MPH - The University of North Carolina at Charlotte<br/>           The NOFO was reviewed for application requirements, evaluation methods, projected outcomes, and gaps in content. As a result, a reference document was developed for program staff to identify expectations for consideration in monitoring performance.</p> |        |       |     |      |            |           |
| <p>19) <i>Questioning the Ethics of Sustaining Our Current Agricultural System: Prison Labor and Undocumented Labor as Modern Forms of Slavery</i><br/>           Sylvia Skylar Carter - Eastern Kentucky University<br/>           This presentation assesses the morality of using undocumented immigrants and prison inmates as sources of agricultural labor. Ultimately, sustaining this system is harmful to people of color and should be reevaluated.</p>  |        |       |     |      |            |           |
| <p>20) <i>Fluid dynamics of hammerhead shark locomotion</i><br/>           Sara Casareto, Taylor Cunningham, and Dr. Daniel Huber - The University of Tampa<br/>           Hammerhead sharks are characterized by a unique head morphology, the cephalofoil. Drag was experimentally measured on each model at varying angles in a water flume. Preliminary results indicate that fluid drag is affected by cephalofoil shape.</p>   |        |       |     |      |            |           |
| <p>21) <i>Interactions of Lignin Dimer-Grafted Particles with Supported Lipid Bilayers</i><br/>           Emily Chase - University of Tennessee at Chattanooga<br/>           Using thiol functionalized mesoporous silica nanoparticles and lignin derivatives, we synthesized, characterized and measured the interactions with synthetic lipid bilayers of lignin dimer grafted MSNPs.</p>  |        |       |     |      |            |           |
| <p>22) <i>Comparative Analysis of Antifungal Susceptibility of Agricultural and Clinical Isolates of Fusarium solani</i><br/>           Tes Cherian - University of Tennessee at Chattanooga<br/>           High antifungal resistance in Fusarium solani may be due to over usage of triazoles in agriculture and gene mutations. This presentation details initial antifungal resistance tests and Geneious data suggesting target genes for potential mutations.</p>  |        |       |     |      |            |           |
| <p>23) <i>A Better Way</i></p>   |        |       |     |      |            |           |

| <i>Hunter Clay - Reinhardt University</i>  |        |       |     |      |            |           |
| <i>A proposal of two ways in which talented football and basketball high school athletes could be better served through establishing minor leagues or creating specialized education programs designed for elite level athletes.</i>   |        |       |     |      |            |           |
| <br>   |        |       |     |      |            |           |
| <i>24) From Hopscotch to Border Hopping: an evaluation of the social factors that trigger child migration from the Northern Triangle to the United States</i>  |        |       |     |      |            |           |
| <i>Taylor Close - Georgia Southern University</i>  |        |       |     |      |            |           |
| <i>This poster will evaluate child migration from Guatemala, Honduras, and El Salvador, more commonly known as the Northern Triangle. It will investigate the push factors that continue to urge child migrants to attempt travel to the United States.</i>  |        |       |     |      |            |           |
| <br>   |        |       |     |      |            |           |
| <i>25) Clinical Trials at the University of West Florida: Advocating for Sponsorship in Undergraduate Clinical Research</i>  |        |       |     |      |            |           |
| <i>Joshua Cook, and Emily Summers - The University of West Florida, Kugelman Honors Program</i>  |        |       |     |      |            |           |
| <i>Honors presentation to advocate for sponsorship of undergraduate clinical research, which is an invaluable experience for students thinking about MD or MD-PhD programs. Presented by two honors students volunteering as Clinical Research Coordinators.</i>   |        |       |     |      |            |           |
| <br>   |        |       |     |      |            |           |
| <i>26) Getting Warmer: The Effect of Climate Change on Vector-Borne Diseases</i>   |        |       |     |      |            |           |
| <i>Hayden Corley - Gardner-Webb University</i>   |        |       |     |      |            |           |
| <i>Climate change is more than just warmer weather; it also means a spread of dangerous disease. The effect climate change has on disease can manifest itself in the manipulation of the parasite, or an increase in competition between animals and humans.</i>   |        |       |     |      |            |           |
| <br>   |        |       |     |      |            |           |
| <i>27) Two Sides of the Same Coin: Panpsychism as a Solution to the Mind-Body Problem</i>  |        |       |     |      |            |           |
| <i>Andrew Coyle - Eastern Kentucky University</i>  |        |       |     |      |            |           |
| <i>The mind-body problem asks how humans can be composed of both a physical, non-thinking Body and non-physical, thinking Mind. How could they interact? In this poster, I present the history of the mind-body problem, as well as a defense of panpsychism.</i>  |        |       |     |      |            |           |
| <br>   |        |       |     |      |            |           |
| <i>28) Contributions to the Workshop for Integrated Propeller Prediction (WIPP)</i>  |        |       |     |      |            |           |
| <i>Aaron Crawford - University of Tennessee at Chattanooga</i>   |        |       |     |      |            |           |
| <i>At UTC's SimCenter, Pointwise and Tenasi were used to contribute to the Workshop for Integrated Propeller Prediction. The results help assess and improve the accuracy of Computational Fluid Dynamics (CFD) predictions for wingtip mounted propellers.</i>  |        |       |     |      |            |           |
| <br>   |        |       |     |      |            |           |
| <i>29) Memphis at 200: Where Is It?</i>  |        |       |     |      |            |           |
| <i>Peyton Cullen - Christian Brothers University</i>   |        |       |     |      |            |           |
| <i>On the eve of its 200th year as a city, many may wonder where the markers of that history are. Surviving unscathed through the Civil War and a disease that took an eighth of the population, Memphis instead modernized in the 20th century. This poster will examine Memphis's history and its complex relationship with historic preservation.</i> |        |       |     |      |            |           |
| <br>   |        |       |     |      |            |           |
| <i>30) Animal Sexualization: A Rhetorical Analysis of Noel Sturgeon's Conclusions on the Sexualization of Women in Advertisements</i>  |        |       |     |      |            |           |
| <i>Ashunna Curtis - Southwest Tennessee Community College</i>  |        |       |     |      |            |           |
| <i>This presentation will examine the animal sexualization of women and focus in on the effects that these images have on consumers.</i>   |        |       |     |      |            |           |
| <br>   |        |       |     |      |            |           |
| <i>31) Autism Stereotypes Among Undergraduate Students</i>   |        |       |     |      |            |           |
| <i>Stephanie Darnell - Eastern Kentucky University</i>   |        |       |     |      |            |           |
| <i>This poster utilizes data from a survey of EKU undergraduate students to examine stereotypes and attitudes among young adults about autism.</i>   |        |       |     |      |            |           |

| 33) <i>The Gay Animal: Theories That Attempt to Explain Homosexuality in Non-Human Animals</i><br>Aron Stephens - Northwestern State University<br>As research on homosexuality increases in volume and import, this poster begins to bridge the gaps in understanding in the animal kingdom and further the understanding of homosexuality throughout the world.   |        |       |     |      |            |           |
| 35) <i>Environmental Energy Sustainability by Measurement</i><br>Sophia Fleri - Georgia Southern University<br>The purpose of this project is to increase the comfort of the occupants of a building while reducing its effects on the surrounding environment.   |        |       |     |      |            |           |
| 36) <i>The Sustainability of Zero-Waste Living: Saving Sea Turtles' Noses One Reusable Straw at a Time</i><br>Lauren Fuller - Eastern Kentucky University<br>Zero waste is a philosophy of living focused on reusing products rather than throwing them away or recycling them. Examples are using reusable straws instead of plastic ones, eliminating ocean waste. This lifestyle greatly helps sustain the Earth.                                      |        |       |     |      |            |           |
| 37) <i>The expression and purification of full length Noxo1 beta</i><br>Jonathan Gallaher - Georgia Southern University<br>Noxo1 is a protein that acts as an organizer. Noxo1 positions other proteins for binding and enzyme activation. The purpose of this project is to determine what conditions will allow for Noxo1's growth and purification to study its function.  |        |       |     |      |            |           |
| 38) <i>Application of Tungsten (W) Attenuators for the Reduction of Downscatter Photons in Dual-Isotope Simultaneous-Acquisition Nuclear Cardiology Imaging</i><br>Steven Garner - Augusta University<br>The photons from isotopes can be used concurrently to detect diseases. However, an issue in the Pb collimator makes these protocols difficult. Based on our results, W would be a suitable replacement for Pb as collimator for these protocols. |        |       |     |      |            |           |
| 40) <i>The Art of Mental Illness: How Art Can Be Used to Address Stigmas and Lead to a Better Perception of Mental Health</i><br>Cheyenne Gibson - Eastern Kentucky University<br>Four paintings depicting first-hand accounts of individuals living with mental health disorders were presented to third-year nursing students. A survey of these students determined the impact on these students' perceptions of these disorders.                      |        |       |     |      |            |           |
| 41) <i>Optimizing Lanthanide Recovery through Variation of Extraction Conditions</i><br>Maya Glander, Shannon M. Biros, and Eric J. Werner - The University of Tampa<br>Lanthanide metals are integral to many industries, and their recovery via recycling or natural occurrence is critical. This study seeks to optimize their recovery in a liquid-liquid extraction method by varying the stir time length in the protocol.                          |        |       |     |      |            |           |
| 42) <i>How Cancer Treatment Affects the Work Performance of Career Firefighters</i><br>Chad Gosnell, and Cassidy Woosley - Eastern Kentucky University<br>This study used interviews to gain insight into how cancer treatment affects the work performance of career firefighters. Different areas of work performance, like the physical, emotional, and social aspects, were analyzed.   |        |       |     |      |            |           |
| 43) <i>Developing an Efficient Method for Visually Identifying Instrumental Audio using Neural Networks and Spectrogram Analysis</i><br>Justin Hall - Georgia Southern University<br>The project aims to develop an efficient method of classifying audio signals by using a neural network to analyze the visual equivalent of an audio sample. The samples will be converted into a log spectrogram format and analyzed using different methods.        |        |       |     |      |            |           |

| <p><b>Hannah Rutledge, David Janssen, and Alyssa Copeland - Gordon State College</b><br/> Our program has worked over the last few years to create partnerships with a variety of departments and student groups in order to gain credibility with the campus culture overall and to avoid the trappings of elitism. Recently, our Provost developed an institutional banner that he dubbed "the Gordon EDGE." This acronym stands for "Engaged innovators, Dedicated scholars, Gifted communicators, and Ethical leaders." Its purpose is to re-shape our academic culture by naming our college's values and character. We intend to demonstrate the "high impact" that our Honors Program has had on our campus and how our Honors Program at GSC embodies the EDGE. We are leading the way in this effort to create a proud sense of Highlander identity.</p>  |          |                       |                       |   |            |           |

| <p>63) <i>The Performance Killers: Depression &amp; Anxiety's Effects on College Students</i><br/> William Lemley - Chattanooga State Community College<br/> The focus of the study was to discover how prevalent depression and anxiety are in the student body of Chattanooga State, and how it affects student performance to inform organizations and agencies within the college.</p>  |        |                      |                      |                                  |            |           |
| <p>64) <i>Assessing selective motor control using a Modified Boyd and Graham scale</i><br/> Madison Lewis, and Dr. Blair Saale - The University of South Alabama<br/> The Modified Boyd and Graham scale was created to be applicable to any joint and to capture small motor control changes. The scale was used by 21 physical therapists and had fair to good inter-rater reliability and excellent intra-rater reliability.</p>   |        |                      |                      |                                  |            |           |
| <p>65) <i>Micro-Actuation Applications of PLZT Materials</i><br/> J. Chandler Liggett - Georgia Southern University<br/> Micro-Electro-Mechanical Systems (MEMS) are micro-scale devices which serve a variety of functions including sensors and actuators. One material commonly known as PLZT shows Photostrictive capabilities which make it an ideal choice for the development of new MEMS devices.</p>                         |        |                      |                      |                                  |            |           |
| <p>66) <i>Teens and Grammatical Structures: How the Youngest Generation Utilizes Grammar</i><br/> Braxton Mahr - Chattanooga State Community College<br/> This presentation analyzes the differences between everyday grammatical structures when used by teenagers on multiple digital platforms. The structures that will be analyzed include informal and formal writing, punctuation, emoticons, and emojis.</p>                  |        |                      |                      |                                  |            |           |
| <p>67) <i>Predictors of Unhealthy Weight Control Behaviors in Adolescents: A Systematic Review</i><br/> Kelse Matthews - The University of Memphis<br/> This review aims to summarize the predictors of unhealthy weight control behaviors in adolescents in recent literature because research has suggested that consequences of such behaviors can lead to mental illness or distress.</p>   |        |                      |                      |                                  |            |           |
| <p>68) <i>Advancement of Brain-Computer Interfaces using Novel Techniques</i><br/> Justin McCorkle, and Andrew Kalaani - Georgia Southern University<br/> This study investigated a new way to increase the accuracy of Brain Computer Interfaces. Using multiple techniques, as well as a newly created variable, we managed to increase the accuracy of existing systems.</p>   |        |                      |                      |                                  |            |           |
| <p>69) <i>A Different View on Perspectives</i><br/> Jasmine McGue - Chattanooga State Community College<br/> My research focused on what affects perspectives on the same events and shows how perspective is affected by gender, age, and biological traits. To collect this data eight men and eight women of all ages were asked to describe the plot of a movie.</p>  |        |                      |                      |                                  |            |           |
| <p>70) <i>Effect of MCC950, a NLRP3 Inflammasome Inhibitor, on Blast-Induced Traumatic Brain Injury in Mice</i><br/> Michael Mendez - Christian Brothers University<br/> Blast-traumatic brain injury affects thousands of U.S. soldiers often resulting in chronic pain, altered mental status and neurodegenerative diseases. This study was done to understand the inflammation mechanism and the potential effects of MCC950.</p> |        |                      |                      |                                  |            |           |

| Title   | Format | Start | End | Room | Visibility | Published |
|---|--------|-------|-----|------|------------|-----------|
| <p>71) <i>Partners in the Parks: Exploring America's Parks from Sea to Shining Sea</i><br/> Michael Mendez, and Megan Brown - Christian Brothers University<br/> Partners in the Parks provides amazing national parks experiences with something for everyone. Not only do honors students see unique features of the United States, but they also interact with the culture and nature surrounding the area.</p>                |        |       |     |      |            |           |
| <p>72) <i>Identifying and Quantifying Strong Surface Convergence Caused by Sea Breezes on the Coast of Alabama</i><br/> Samantha Michlowitz - The University of South Alabama<br/> Sea breezes can lead to large thunderstorms. The ability to predict them is difficult. This research will tell whether the strong opposing background flow, along with a fast-moving sea breeze, could lead to strong surface convergence.</p> |        |       |     |      |            |           |
| <p>73) <i>Solving a Problem at its Root: Is Aquatic Vegetation the Answer for Safe Composting in an Urban Brownfield?</i><br/> Sheena Mondeddu - Augusta University<br/> Harrisburg, GA lacks fertile soil as it has been deemed a food desert. The soil is contaminated with a number of heavy metals. We are developing composting methods to rehabilitate the soil and deliver it to the residents of Harrisburg.</p>          |        |       |     |      |            |           |
| <p>74) <i>Where to relax and study as a student at the University of Tennessee at Chattanooga</i><br/> Jesse Moore, Elise Steele, Mark Drinkard, and Colton Smith - University of Tennessee at Chattanooga<br/> The goal of our proposed research is to determine the best areas for students' mental restoration to reduce anxiety, Gamma and high-Beta activity, levels and increase focus, frontal lobe Beta activity.</p>     |        |       |     |      |            |           |
| <p>75) <i>The Christian Themes of C.S. Lewis' Chronicles of Narnia and J.R.R. Tolkien's Lord of The Rings</i><br/> Gabriela Morales Medina - Christian Brothers University<br/> This poster will evaluate some of the prevalent Christian themes found within Lewis' Chronicles of Narnia and Tolkien's Lord of the Rings. A particular focus will be given to the themes of pain, suffering, despair and hope.</p>               |        |       |     |      |            |           |
| <p>76) <i>Coagulase-Positive Staphylococcus aureus on Military Base Gym Equipment</i><br/> Melinda Morgan - The University of West Florida, Kugelman Honors Program<br/> Bacteria from the genus Staphylococcus can cause skin infections, food poisoning, septicemia, and more. Gym equipment in six military gyms in NW FL will provide inocula for microbiological media selective for staph and tested for coagulase.</p>     |        |       |     |      |            |           |
| <p>77) <i>Cultural Asymmetry Inside the Firm and Its Effect on Collaboration Within the Supply Chain Industry</i><br/> James Morris - Georgia Southern University<br/> This paper examines the cultural asymmetry of the firm, department, and individual levels based on four attributes to determine what cultural values may increase intra-firm collaboration and performance at the department and individual levels.</p>    |        |       |     |      |            |           |
| <p>78) <i>A Shift in Female Identity: British Punk to British Post-Punk Era</i><br/> Kelsey Morrisson - Christian Brothers University<br/> The British "rock 'n' roll" scene was initially a male dominated space. With the introduction of the British post-punk music scene, women began picking up guitars and rocking the stages historically designated for men and, quite literally, stealing the spotlight.</p>            |        |       |     |      |            |           |
| <p>79) <i>The Unseen College Crisis: Food Insecurity at a Southeastern Urban University</i><br/> Ashlyn Murrell - University Honors Program, UAB<br/> Aimed at addressing food insecurity on UAB's campus, this study hopes to create a foundation for future studies and assist developing campus programs.</p>  |        |       |     |      |            |           |
| <p>80) <i>Feminism, Misandry, and Misogyny: Is there a compromise?</i><br/> Rose Nielsen, Beth Day - Reinhardt University</p>   |        |       |     |      |            |           |

| <p>Currently, the word feminism evokes a range of emotions from disgust to hope, and in most cases a level of confusion. The presentation seeks to clarify key terms and will analyze the benefits and pitfalls of the associated perspectives.</p>  |        |       |     |      |            |           |
| <p>81) <i>What Factors Determine the Success of NGOs in their Promotion of Democracy?</i><br/> Mariane Ntagungira - The University of Tampa<br/> This paper explores the relationship between the presence of non-governmental organizations and democracy growth in the Philippines, South Africa and Bangladesh, paying attention to intervening variables like corruption and local involvement.</p>  |        |       |     |      |            |           |
| <p>82) <i>The Sublethal Effects and Bioaccumulation of 17-alpha EthinylEstradiol in Lumbriculus variegatus</i><br/> Kikelomo Ogunsemore, and Faith Wiley - Augusta University<br/> With less than 1% of Earth's total water available for human consumption, there is concern about toxic contaminants affecting available freshwater sources. Ethinyl estradiol, a synthetic drug, was analyzed for its effect on freshwater invertebrates.</p>   |        |       |     |      |            |           |
| <p>83) <i>Designing a Mobile App to Help Young Adults Develop and Maintain Mental Well-Being</i><br/> Maya Patel, Krisha Shah, and Aman Shah - The University of Tampa<br/> This study is focused on developing the design and message framing of a mobile application that aims to promote mental well-being among young adults between 18 and 24 years old. Our results demonstrate the pressing need for such a tool.</p>   |        |       |     |      |            |           |
| <p>84) <i>Examining the Effects of Social Interaction and Nicotine Exposure on Mesolimbic Dopamine Functioning in Mice</i><br/> Robyn Pennella, Leslie A. Robinson, PhD, and Deranda Lester, PhD - The University of Memphis<br/> The present study aimed to examine the impact social factors and nicotine exposure on mesolimbic dopamine transmission in adolescent mice.</p>   |        |       |     |      |            |           |
| <p>85) <i>Venous Malformation in a Collegiate Rifle Player</i><br/> Lindsay Perrin - Georgia Southern University<br/> Venous malformations are a common occurrence. However, there is minimal research on treatment options besides surgery. It is important to find different treatment options because some patients have restrictions from governing bodies (NCAA) or patient preference.</p>   |        |       |     |      |            |           |
| <p>86) <i>The Status of Fifth Amendment Civil Liberties in the Criminal Justice System</i><br/> Rebecca Phelan - Chattanooga State Community College<br/> This paper reviews how the condemnation of ideas limits or obstructs the civil liberties guaranteed under the Fifth Amendment and how modern social movements, such as Black Lives Matter, hope to address these issues.</p>   |        |       |     |      |            |           |
| <p>87) <i>Ex vivo activation of muscarinic acetylcholine receptors induces phosphorylation of GSK3-beta and ERK ½ in the telencephalon of the adult zebrafish (D. rerio) brain.</i><br/> Grace Powers - Georgia Southern University<br/> This study aims to develop a system for testing neuro-active drugs on zebrafish brains to complement traditional mammalian vertebrate models, focusing on if learning and memory-associated receptors in zebrafish function similarly to those in humans.</p> |        |       |     |      |            |           |
| <p>88) <i>Emojis: Downgrade or Development?</i><br/> Serena Priestley - Chattanooga State Community College<br/> Emojis are commonly used without thought, though linguists have been finding that they are more than just pictures, but a development to the English language. Each one can be used in a variety of ways and can greatly affect the tone of a writing.</p>  |        |       |     |      |            |           |
| <p>89) <i>Increasing Midterm Voter Turnout: A Leadership and Service Project</i><br/> Emily Pritchett, and Savannah Renfro - Cleveland State Community College<br/> This poster presentation outlines our problem-based learning project focused on increasing voter turnout during the midterm elections via social media, interviews, and initiatives to take people to polling stations.</p>  |        |       |     |      |            |           |

| <p><i>Predator cues effect animals in many ways, including their frequency of and location of foraging. We aim to test how hearing known predator calls effect foraging patterns in Oldfield mice, Peromyscus polionotus. We predict that mice will forage less frequently in range of a known predator.</i></p>   |        |       |     |      |            |           |
| <p>100) <i>Differential effect of HMO monomers found in breast and formula milk on Bifidobacterium infantis</i><br/> Paula Sinche, and Amanda Doris - The University of North Florida<br/> <i>Effects of L-fucose on B. infantis growth compared to infant formula were observed. Effects of L-fucose &amp; HMOs are structure &amp; species-dependent. The long-term effects are lower risk of obesity, diabetes, &amp; cardiovascular disease.</i></p>   |        |       |     |      |            |           |
| <p>101) <i>A Multi-Variable Sensing Platform for Water Quality Monitoring in the Distribution Network</i><br/> Allie Skaggs - Morehead State University<br/> <i>This will design and develop a water quality monitoring system, with the objective of notifying the user of the real-time drinking water quality parameters. The system is expected to measure indicators of water quality, such as temperature, and pH.</i></p>   |        |       |     |      |            |           |
| <p>102) <i>Anthropogenic factors may affect cardiac activity in the Atlantic ribbed mussel</i><br/> Ashlyn Smith - Georgia Southern University<br/> <i>It is largely unknown how anthropogenic factors, such as roads, directly affect the physiology of intertidal animals. It has been found that measuring heartbeat is an effective way to understand the physiological stress response of the ribbed mussel.</i></p>  |        |       |     |      |            |           |
| <p>103) <i>An Evaluation of the Effectiveness of Precision Teaching and Direct Instruction on Reading Fluency</i><br/> Joshua Smith, Gregory Pilot, Mary Carter, Nidhi Patel, Traci Taber BCBA_D, and Mary Sawyer BCBA-D - Francis Marion University<br/> <i>The purpose of this study was to evaluate the effects of a precision teaching treatment package on the reading fluency of elementary-aged students. Designed for learners to acquire an emerging, foundational literacy repertoire, elements of the treatment package included direct instruction, behavior management techniques founded in applied behavior analysis, and data-based decision making.</i></p> |        |       |     |      |            |           |
| <p>104) <i>Big Sweep: An Environmental Conservation Effort</i><br/> Joy Smith, Megan McDowell, and Malik Stewart - Gardner-Webb University<br/> <i>Every year the Gardner-Webb Honors program participates in the nationwide event, Big Sweep, a conservation effort for local waterways. We utilize this weekend to focus on the environment as well as building relationships among honors members.</i></p>  |        |       |     |      |            |           |
| <p>105) <i>Evaluation: Slave Haven Underground Railroad Tour</i><br/> Awa Sow - Southwest Tennessee Community College<br/> <i>The Slave Haven Underground Railroad Museum gave an emotional feeling and great experience of slave life. Visiting and exploring the museum can build the visitor's criteria of evaluation and gives the tourist a different outlook of life.</i></p>  |        |       |     |      |            |           |
| <p>106) <i>Using the Clock Drawing Test to Analyze Cognitive Performance in Parkinson's Disease and Healthy Adults</i><br/> Hemant Srivastava - University Honors Program, UAB<br/> <i>The clock drawing test is a rapid assessment that can distinguish Parkinsonian and control participants, and correlates with cognition measures.</i></p>  |        |       |     |      |            |           |
| <p>107) <i>Investigations of the Mechanism of Action for Lung Cancer Cell Death by a 4-Trifluoromethoxy Substituted Chalcone Derivative</i><br/> Trevor Stantliff, and Amanda J. Krzysiak - Bellarmine University<br/> <i>Chalcones are a class of natural products with anticancer activity. We identified a chalcone drug candidate against lung cancer and have explored the mechanism of action (MOA) of this drug. Here we present the results of our investigation.</i></p>  |        |       |     |      |            |           |

| 109) <i>Time Changes Everything: Examining Socioemotional Selectivity's Effects on Entrepreneurial Intentions and Attitudes</i><br>Zane Sudan - Georgia Southern University<br><i>The purpose of this research is to identify whether a given person is more likely to pursue a career in entrepreneurship depending on their age, and how their attitudes towards entrepreneurship may change over time and with experience.</i>                              |        |       |     |      |            |           |
| 110) <i>Biological Survey of the Interior Coppice of San Salvador</i><br>Stephanie Swart, Laurel Jobe, Thomas Wiegand, and Jessica Wicker - University of Tennessee at Chattanooga<br><i>The purpose of this research was to conduct an initial biotic survey along a portion of an inland trail on the Northeastern end of San Salvador island. There was a focus on the species richness comparative to the Bahamian Field Station Trail Guide.</i>          |        |       |     |      |            |           |
| 111) <i>Representation of Arabs and Islam in Italian Renaissance art between 1490 and 1520</i><br>Megan Tanner - Georgia Southern University<br><i>This poster examines the influence of the Islamic religion and culture on Renaissance Italy, as well as the portrayal of Arabs in art between 1490 and 1520. It will also compare attitudes towards the Arab minority to that of contemporary society.</i>  |        |       |     |      |            |           |
| 112) <i>Neuroscience Education in Speech-Language Pathology. What does it look like?</i><br>Abigail Tempel, Dr. AnnMarie Knight, Dr. Alex Basilakos, and Kristyn Guardino - Columbia College<br><i>This study investigated current neuroanatomy and neuroscience curriculum in a sampling of undergraduate and graduate programs across the United States to examine current practices for educating Speech Language Pathologists in these academic areas.</i> |        |       |     |      |            |           |
| 113) <i>ATAD3A Regulation by the Estrogen Signaling Pathway in Breast Cancer Cells</i><br>Parth Thakkar, Yong Teng, and Ron Chemmalakuzhy - Augusta University<br><i>ATAD3A has been shown to be a crucial mediator in promoting cell cycle progression. The objective was to determine whether the ATAd3A is an Estrogen Receptor- target and to determine the role of (ER) in estrogen induced ATAD3A upregulation.</i>                                      |        |       |     |      |            |           |
| 114) <i>The Great Linguistic Detective</i><br>Macy Tidmore - Chattanooga State Community College<br><i>This study addresses how the age, gender, and/or region of a person can be revealed through his or her use of punctuation and emojis in written language; however, the identity of him or her is shown most effectively in dialect.</i>   |        |       |     |      |            |           |
| 115) <i>Examining the Effects of Environmental Enrichment on Mesolimbic Dopamine Release Associated with Addiction</i><br>Shelby Towers - The University of Memphis<br><i>This study aimed to determine how aspects of environmental enrichment (EE; physical objects vs. social interaction) affect dopamine transmission and the propensity of drug abuse.</i>   |        |       |     |      |            |           |
| 116) <i>"The True Face of America": Colson Whitehead's The Underground Railroad</i><br>Mac Treadwell - Southwest Tennessee Community College<br><i>The true face of America was nothing short of hypocritical throughout the years of slavery.</i>   |        |       |     |      |            |           |
| 117) <i>Effects of Vitamin D Receptor Knockout, Vitamin D Deficiency, and Diabetes on Corneal Epithelial Nerve Density</i><br>Sarah Vick - Augusta University<br><i>This project tests the hypothesis that Vitamin D deficiency exacerbates preexisting primary corneal pathologies. To identify variabilities, the mouse corneas were collected, stained, and analyzed through image processing to determine nerve density.</i>                               |        |       |     |      |            |           |
| 118) <i>The Movement Analysis of a Maximum Force Kick on a Soccer Ball</i>   |        |       |     |      |            |           |

| Title  | Format | Start | End | Room | Visibility | Published |
|--|--------|-------|-----|------|------------|-----------|
| <p><i>Jordan Vitale, and Kylie Ameres - Gardner-Webb University</i><br/> <i>The movement analysis of a kick on a soccer ball shows the key positions necessary to create the optimal form for striking a soccer ball. The key positions include 4 phases: planting, initial contact, follow-through, and landing.</i></p>  |        |       |     |      |            |           |
| <p>119) <i>Effects of Government Regulation and Deregulation on Asymmetric Information and the Banking Industry</i><br/> <i>Austin Wagner - Georgia Southern University</i><br/> <i>This poster presentation will analyze the effects of government regulation and deregulation within financial institutions throughout the past century and its role in decreasing asymmetric information between contractual parties.</i></p>   |        |       |     |      |            |           |
| <p>120) <i>Declining American Support for Capitalism – But Why? An Elaboration on Newland’s Free Market Mentality Index in the United States</i><br/> <i>Mariah Warner - Mississippi State University</i><br/> <i>I re-examine claims that a trend of declining positive attitudes toward capitalism is occurring in the United States and demonstrate that Americans are rejecting capitalist policies more than they are actually straying from pro-capitalist ideologies.</i></p> |        |       |     |      |            |           |
| <p>121) <i>Effects of maternal diet and stress on Immunoglobulin A concentration in Rhesus Macaques</i><br/> <i>Riley Wildeman - Georgia Gwinnett College</i><br/> <i>Immunoglobulin A (IgA), is an antibody involved in immune development of neonates, and is a component in breast milk. Maternal diet and stress are said to influence breast milk IgA concentration. Rhesus macaques were studied to examine said effect.</i></p>   |        |       |     |      |            |           |
| <p>122) <i>Stress=College?: A proposal to change the pattern</i><br/> <i>Beau Wilkins - Reinhardt University</i><br/> <i>Student stress and anxiety are critical issues on university campuses. Based on research, animal contact is an effective way of reducing anxiety. This presentation analyzes programs using animal contact to address student stress and anxiety.</i></p>   |        |       |     |      |            |           |
| <p>123) <i>Aspects of Modern Feminism in ‘The Golden Girls’</i><br/> <i>Amanda Kate Wood, and Anna Hassett - Georgia Southern University</i><br/> <i>This poster will display aspects of modern feminism found in the American sitcom The Golden Girls which aired on NBC from 1985 to 1992. These displays of equality were far beyond their time and deserve to be recognized.</i></p>   |        |       |     |      |            |           |
| <p>124) <i>Biomechanical Analysis of the Butterfly Stroke in Collegiate Swimmers</i><br/> <i>Lindsey Wright, and Courtney Kanetzke - Gardner-Webb University</i><br/> <i>This study uses Dartfish software to analyze the streamline movement and initiation of the butterfly stroke in competitive swimming. A biomechanical comparison was made between Gardner-Webb Swimmers and World-Class swimmers.</i></p>  |        |       |     |      |            |           |
| <p><b>125) “I Smell an Atheist! It’s That Freethinking!”: Molière’s Le Tartuffe and the Salonnères</b><br/> <i>Tony Fielding - Christian Brothers University</i><br/> <i>Molière, salonnères, and the “divine” puppetry of King Louis XIV: How feminism was radically challenged via Molière’s Le Tartuffe in 17th century France.</i></p>   |        |       |     |      |            |           |

| So you agreed to host a conference: how to succeed when you're in over your head   | Workshop     | Mar 29, 2019 3:30:00 | Mar 29, 2019 4:30:00 | Ben Hollander                       | PUB        | Yes       |
| <p><b>Paul Fitzgerald, and Kirsten Bartels - Northern Virginia Community College; Northwestern State University</b></p> <p><i>This is the 47th annual SRHC conference, and many of our colleagues have hosted this conference before us. Despite the history, it's always, by its nature, a complex, and occasionally stressful endeavor. There's no way to get around the fact that it takes a lot of work to do it well! Regardless of where you are in your timeline, there is always the next thing to do, another fire to put out, and another batch of emails to send. Despite the complexity, hosting a successful conference can be a very rewarding and meaningful experience. Here, we present the basic structure of conference planning, discuss solutions to many recurring issues, and discuss how to avoid many of the mines that lurk in the dark waters of conference organization.</i></p> |              |                      |                      |                                     |            |           |

| Parental Influencee<br><i>Mommy, Where is Home Tonight?</i><br><b>James Fry - Chattanooga State Community College</b><br>A presentation of the children's book "Mommy, Where is Home Tonight" helping homeless children understand the journey they are on, and how they are not alone. Recent data is used to show many children on the same path, but there is vital help.<br><i>Sonder: Between Two Lands</i><br><b>Aishwarya Mukkavilli - Birmingham-Southern College</b><br>This presentation elucidates upon the intersection of two vastly different yet overlapping phenomena: the architecture of cultural identity constructed by first- and second-generation immigrants, and sonder.<br><i>"Adults Get Scared": Parental Fears, Liminality, and the Symbolic Order in Neil Gaiman's 'Coraline'</i><br><b>Mickella Rast - Virginia Wesleyan University</b><br>Enter a world of symbolic transgressions and parallel parents, but resist sewing buttons over your eyes: analyze Neil Gaiman's 2001 hit Coraline and its implications for parent-child relationships within the structure of the symbolic order.  | Talk   | Mar 30, 2019 8:30:00 | Mar 30, 2019 9:30:00 | Hawthorne | PUB        | Yes       |
| Political Figures<br><i>The Creation of a Willful and Radical Subject: Carmen Yulín as a Public Figure Post-Maria</i><br><b>Gabriela Morales Medina - Christian Brothers University</b><br>In post-hurricane Maria Puerto Rico, a new voice took center stage within political discourse regarding the island. Her name is Carmen Yulín. My intent is to explore the different factors that allowed Yulín to assert herself as a political figure.<br><i>The Legacy of Josephine Baker: Performer and Activist</i><br><b>Fiona Scruggs - Radford University</b><br>Josephine Baker's revolutionary roles in the arts, World War II, and Civil Rights Movement inspired a research trip to study her life in France. This culminated in a dance performance of original choreography and reflection based on Baker's life.<br><i>Surviving R. Kelly: The Power of Documentaries in the Fight for Justice</i><br><b>Aniya Taliaferro - Norfolk State University</b><br>R. Kelly has been the latest to receive backlash for his abuse against women. The docuseries "Surviving R. Kelly" exposes the details of abuse. With the use of film and technique, justice became the only response to such a documentary.   | Talk   | Mar 30, 2019 8:30:00 | Mar 30, 2019 9:30:00 | Auburn    | PUB        | Yes       |
| Public Sector and Safety<br><i>Big Fire, Big Water: Modern Fire Department Best Practices in High-Rise and Standpipe Equipped Buildings</i><br><b>Nicholas Brondum - Eastern Kentucky University</b><br>This presentation will relay the various components of a modern firefighting package for high-rise and standpipe equipped buildings. Fire dynamics, fire service hydraulics, fire service tactics, and recent firefighter research will be considered.<br><i>The Evolution of Law Enforcement Technology and its Effects on Officer Health and Safety</i><br><b>Alyssa Clark - North Carolina Wesleyan College</b><br>Law enforcement technology has made great evolutionary strides throughout history and has increased officer safety. This however, has come at a cost to the health of officers as they retire and live the rest of their lives with health issues.<br><i>Reality Versus Fiction: An Analysis of Emergency Management Smart Practices Portrayed in Disaster Movies</i><br><b>Lisa Wier - Eastern Kentucky University</b><br>The presentation explores how various emergency management concepts are portrayed in films. The films and concepts analyzed are mass evacuations for Jurassic World, earthquake preparedness for San Andreas, and near-earth impacts for Your Name. | Talk   | Mar 30, 2019 8:30:00 | Mar 30, 2019 9:30:00 | Brinkley  | PUB        | Yes       |
